

THE EDISON AND THE VICTOR ARE SOVEREIGN OVER ALL

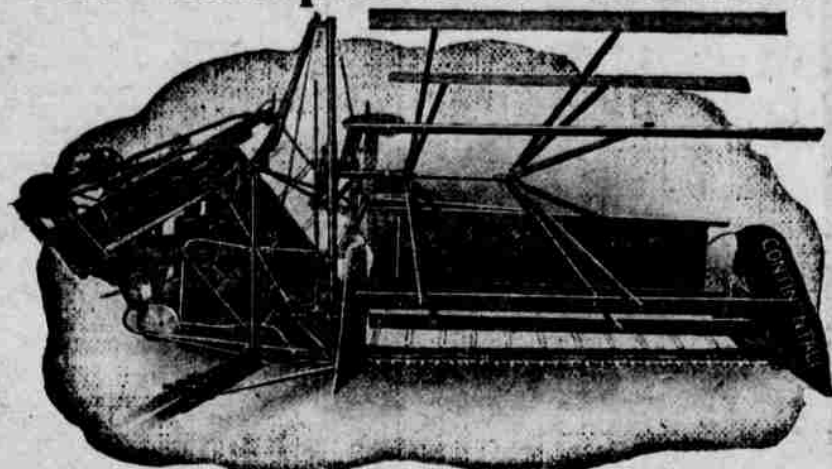

IN the character and volume of pure, clear tone; in designs, in workmanship and materials, they have no equals, and you may as well have the best; for with these essentials considered, they are no higher in price than those machines which sort of give one the "crawls" because of their harsh, grating and scratchy noise. Every buyer of an EDISON or a VICTOR at our store, however unfamiliar with talking machine values, is assured that he is paying no more than they are intrinsically worth—the same price he would pay anywhere in the east, the same price he would have to pay for a machine from the factory direct. Prices as low as \$10.00; larger machines at \$22.00 and \$30.00. Pay by the month if you wish.

The only complete stock of both EDISON and VICTOR
Machines and Records in Montgomery County.

An Independent Binder!

THE trust has not gobbled us yet, I mean the Johnston Binders and Mowers. These machines are made and sold entirely independent of any trust, and are the best on the market today. I carry a full stock of repairs for these machines; there is also a large house in St. Louis that will supply you with repairs as long as you live.

If you believe liberty and independence is the birthright of every American citizen, and that no trust or corporation has any right to dictate to you the kind of machine you shall buy, then say to them, by your action in patronizing an independent company, hands off. Compare life in this free and independent country, with life in a country ruled by an absolute monarch, then compare this with the condition of the farmers in this country, if there were no independent Binders and Mowers, and you will see at once how greatly it is to your advantage to patronize an independent company. My Binders and Mowers are not made by any trust, nor controlled by Rockefeller, Morgan, McCormick or any other multi-millionaire. The Johnston machines are made by a strictly independent company, and their twine (which I always carry in stock) runs 225 feet more to the ball than any other twine made. Call and see me.

The P. & O. Canton Double Row Cultivator

Does the same amount of work with three horses that two single row cultivators will do, saving the work of one horse and one man.

The compound raising levers are not found on any other cultivator. Each raising lever is composed of two auxiliary levers, which in regulating the depth are entirely independent of each other, giving each gang an individual adjustment. In raising the gangs out of the ground each pair of auxiliary levers forms one compound lever, which raises and automatically locks one pair of gangs out of the ground. This is the best device of this kind ever put on a cultivator, and it alone places the Canton Cultivator ahead of all others. The gangs have a perfectly horizontal movement. The spreader runs on rollers so that it does not retard the lateral swing of the gangs.

The gangs have a free movement on the ends of the spreader arches, so that in raising or lowering them the spreader is not disturbed.

The frame can be shifted to balance the weight of the driver by a lever. Large wheels with dust-proof boxes. The wheels can be set in or out by the adjustable axles.

THIS PLOW FOR THE NEXT 30 DAYS FOR \$40.

THAT BRASS IDOL INDUSTRY.

Birmingham Finds Their Manufacture
is No Longer Lucrative.

The interesting details of the slump in brass idols at Birmingham make it plain that here once more the British manufacturer has gone down before the conquering American, says the London Daily News. The manufacturers say that there used to be a trade in idols, but that competition has "killed the industry in Birmingham." "We make brass images," said one of the idol-founders of the city, "and really they are so beautiful that I don't wonder the heathen falls down and worships them."

A curio dealer who stocks idols said that idols are still made in Birmingham. There was a certain demand for them, but it was a small one. They were made for curio dealers and were sold by them, not to the heathen, but to Christians interested in missionary work, who liked to have on their mantel pieces a "real" heathen idol. Years ago brass images were freely made for foreign agents, and, Bishop Thornton notwithstanding, I fear they would be made to-day if an order came for a supply of them.

HAS NO ROOM FOR MONEY.

President Stillman of the National City bank of New York was born in Texas, but is a clean cut Yankee from Connecticut. As president of the National City bank he is almost as powerful as the Rothschilds are in Europe.

Said one of his intimates recently: "There are no fireworks about Jim—just plain ordinary get there. And he carries the queerest lot of truck in his pockets. One day some of us made him turn out his collection."

"He had a couple of penknives, a buckeye, a shoe buttoner, a rabbit foot, two or three rubber bands, a silver pencil, a bunch of keys, a cigar puncher, a gold watch, a leather washer, a corkscrew, a seal, a memorandum book, an elevated railroad ticket, some theater passes, three safety pins, a box of matches, and a newspaper clipping."

"You haven't mentioned money."

"Money? Why, the man didn't have a cent."

IDEAL PLACE FOR CHICKENS.

The mania of city people to keep chickens as soon as they move to a suburban section, even if the neighborhood is well built up, is aptly illustrated in a block of new houses in Mount Airy.

With great ideas of the character of people he was going to sell his houses to, the builder provided deep back yards with a wide alley in the rear. His avowed object was to enable the purchasers to erect automobile houses in the yards and

to run the machines in by the alleys.

The houses are now all occupied, and, while not a single automobile shed appears, nearly half the yards contain chicken houses and the barnyard feature is the most conspicuous in the new section.—Philadelphia Record.

IT HAS GROWN.

"Have you ever heard Jimkins relate about the time he got half-way up Mt. Blanc with one of his little nephews and no guide?" asked one man of another.

"How long ago did he tell you about it?" was the evasive reply.

"Last March, when he just got home," said the first man.

"Well," said the other, "in the eight months since then he has climbed the rest of the way, succeeded a fainting guide and sustained a snowstorm on the summit, resuscitated two benumbed strangers on the way down, and guided the entire party to the foot, where a group of frantic relatives were waiting."—Stray Stories.

A SUGGESTION.

"Here, you!" angrily shouted the beginner at golf, "quit laughing at my game. If I hear any more impudence from you I'll crack you over the head."

"All right, sir," replied the cad; "your cleek is de best stick to use fur dat."

Bellville.

Too much rain for corn planting. Wheat and oats are looking better.

S. Wilson and daughter Bertha, of near Prices Branch visited Ed Meyer Sunday.

Fritz Hensick bought a mule of Harry Spencer for \$115.

Mrs. Caroline Draper and sons, George and Robert, of Warrensburg are visiting friends and relatives in this and surrounding localities.

Miss Ella Fricker who has been sick in St. Louis for several weeks was able to come home Monday.

Miss Rhoda Craven who was taken to a St. Louis hospital for treatment of St. Vitus dance, we are glad to state, is improving fast and will be able to come home in a few days.

A Narrow Escape.

G. W. Cloyd, a merchant, of Plunk, Mo., had a narrow escape four years ago, when he ran a jimson bur into his thumb. He says: "The doctor wanted to amputate it but I would not consent. I bought a box of Bucklen's Arnica Salve and that cured the dangerous wound." 25c. at Crump & Kidwell's drug store.
